NAVIGATE SIMPLY

ELEVATE FIELD OPERATIONS

Navigate field operations with Xplor, a mobile data hub that enhances collaboration between field and office teams. Xplor directs users to key apps like surveys and work orders, provides access to real-time asset data, and enables on-the-go data capture and sharing images.

APP FEATURES

Mobile GIS Hub
Centralize data access to ensure users have the right information for efficient work.

Workflow
Quickly locate assets details to improve maintenance and response times.

Labeled Images
Capture and share images tagged with date and location

Collaboration Tools
Instantly share maps and data for better communication.

BENEFITS

- Real-time data sharing between field and office.
- Direct field access to GIS data for improved decision-making.
- Boost productivity with real-time asset data to optimize maintenance.
- Rapidly locate assets to spot issues early and accelerate response.
