Taskr

TASK MANAGEMENT FOR FIELD TEAMS

Taskr is a flexible, easy-to-use platform that helps teams get field work done without the paperwork or complexity. Team leads can assign tasks in the office using the web app by selecting a location on the map or choosing from an existing asset inventory, while field crews use the mobile app to view their assignments, complete work, and add notes or photos.

Key Features

Map-Based Tasking
Drop a pin or select an asset to create and assign work in seconds.

Web + Mobile Access
Built on the Xplor platform for planners and field crews to stay connected.

Real-Time Updates
Track progress, upload photos, and mark tasks complete from anywhere.

Esri GIS Integration
Use your existing GIS data—no duplication or complex setup.

Offline Mode
Access tasks with or without connectivity

Why Use Taskr

Built for Action
Keeps crews moving and work progressing.

Streamlined for the Field
Easy to use, so your team can focus on the job.

Versatile Use Cases
Supports inspections, work orders, and permitting tasks.

Quick to Deploy
Implementation only takes months - not years.

Field-First, Office-Smart
Designed for boots on the ground, with oversight from the office.
